Ogunyemi Samuel Ayomide

Full-stack & machine learning engineer

Akure, Nigeria

I ship complete, working products: from the PRD to the database to the deployed app.

EDUCATION

Federal University of Technology, Akure (FUTA)

Computer Science

Final-year student. Final-year project: Student Dropout Risk Prediction System.

PROJECTS

YIT0 SHOT IT — Photographer Portfolio

Live

A live photographer portfolio with an admin dashboard for enquiries, gallery uploads and services.

Page render from Lagos, database in Oregon: 2.02 s · Page render from Lagos, database in Ireland: 0.97 s

Next.js · Node.js · Express · SQLite (libSQL / Turso) · Vercel Blob · Vercel

Student Dropout Risk Prediction System

Shipped

Final-year project: ML models trained on survey data from southwest Nigerian universities, deployed as a Flask web app.

Random Forest accuracy, augmented data: 94.1% · Random Forest recall, augmented data: 98.0%

Python · Logistic Regression · Random Forest · XGBoost · Soft-voting ensemble · Flask

ArenaPass

In active development

Arena and venue ticketing platform with three role-based dashboards. In active development.

Next.js 14 · TypeScript · Supabase Auth · Postgres (Row Level Security) · Paystack

Football Organisation E-Ticketing System

Case study

Product and systems-design case study: time-gated ticket sales, QR tickets and gate validation, with a full PRD and a 12-week plan.

Paystack · QR tickets · Gate validation

LEADERSHIP

Faculty President, School of Computing

Federal University of Technology, Akure

Chairman, ACOMS Electoral Committee

Association of Computing Students (ACOMS), FUTA

SKILLS

Web	Next.js, TypeScript, Node.js, Express, Tailwind CSS
Data & backend	Postgres, Supabase (RLS), SQLite, Flask
Machine learning	Logistic Regression, Random Forest, XGBoost, Ensembles (soft voting), CRISP-DM
Payments	Paystack
